

Your Payment Partner

# Introducing Payouts from Pay@

Your customers can now get paid in **cash**!

Pay@ has enabled a **secure** journey for your customer to get **paid in cash** utilising a **unique Pay@ Payout reference number and a pin** which you as a biller provide to the customer.

Your customers will receive a **unique pin generated by your system that is linked to their Pay@ Payout reference number**, which ensures **ONLY** the **correct beneficiary** receives the payment (and no one else).

Speak to your **Relationship Manager** today for more information and pricing.

## Integrate with the Pay@ Payout API to enable cash collection for your customers.

1. Your customer selects to get paid in cash at a store.
2. You send your customer a unique Pay@ Payout reference number and pin.
3. Your customer will present the unique Pay@ Payout reference number to the teller.
4. Once the Pay@ Payout reference number is validated with your system, your customer is asked to key in the pin on the POS device in store.
5. The pin is then sent through to your system to verify.
6. The Payout then takes place, and your customer gets the cash and a receipt.
7. Your system is notified in real time of the successful Payout.
