

Recurring and subscription payments

Fast-track routine payments

Pay@ enables a process to repeat card payments easily and securely. When the card is loaded, the initial card transaction uses 3DSecure. After that, subsequent transactions can happen automatically or with a single customer click. All card data is tokenized and stored safely.

key features

- Easy to use integration that allows secure loading of the customers card number using 3DSecure
- Visa/Mastercard tokenization with no sharing of card data and ensuring PCI compliance
- Simply provide the token and amount with the subsequent transaction to receive a payment
- Improve your collection success rates
- Submit transactions anytime as agreed with the payer

Digi-API™

The leading solution to build payments your way!

Give your customers access to a variety of payment options through your own website or mobile app. Access to account and invoice lookups, loading for authorisation and payment, and customised hand-backs once payments are complete, are available to you.
